

Register telemetry dataset by digital object identifier:
doi:10.24431/rw1k118

Create a Tale, entering a name and selecting the RStudio (Rocker) environment

A container is launched based on selected environment with an empty **workspace** and external **data** mounted read-only

Enter descriptive metadata including authors, title, description, and illustration image

```
schema:author  
schema:name  
schema:category  
pav:createdBy  
schema:license
```

Execute code/scripts to generate results/ outputs

Export the Tale in compressed BagIt-RO format to run locally for verification.

Publish the Tale a Data ONE member node generating a persistent identifier.

Re-execute in Whole Tale
